

Casino Game Logs Audit Report – July 2016

The Directors

Bwin.Party Digital Entertainment Plc

This is to confirm that iTech Labs has examined the casino game logs in the gaming system of Bwin.Party Digital Entertainment Plc for the month of **July 2016** as recorded by the respective game servers. iTech Labs has calculated the Return To Player (RTP) for all the games using the data from the game logs.

The table below lists the actual calculated RTPs for real money games played at the Bwin.Party Digital Entertainment Plc game servers. The Bwin.Party Digital Entertainment Plc game servers service the following internet gaming sites:

www.partycasino.com www.partypoker.com www.gamebookers.com www.partypoker.it
www.partycasino.it

Game Type Description	RTP
Table Casino	101.84%
Blackjack	99.02%
Video Poker	98.23%
Roulette	97.85%
Single deck blackjack	96.47%
Slots	96.14%
Table Poker	93.89%
Classic Slots	93.63%
Jackpot Slots	92.61%
Raffle Jackpot	91.67%
Keno	90.32%
Other games combined*	97.50%
All games combined	96.19%

* Other games combined include Scratch, Hi Lo, Live Dealer Baccarat, Live Dealer Blackjack, Fixed Odds and Live Dealer Roulette Games.

There were a large enough number of game records to give the RTP calculations sufficient statistical power. The actual RTPs are greater than normally required by gaming jurisdictions. For all card games, the actual RTPs are very close to the maximum theoretical expectation.

The actual RTPs shown above are percentages of total actual winnings to bets for each game type. They do not reflect outcomes for individual games or future games. iTech Labs has done limited sanity checks to verify the integrity of the game logs. iTech Labs also maintains a copy of the game logs for verification purposes.

The scope of the review did not include reviews of financial controls or casino operations. We believe that the RTPs were calculated correctly from the game logs based on the actual bets and winnings.
